

Wireless label printer GT3600

Wireless label printer

The wireless labeling machine GT3600 is a new generation of R&D technology smart labeling machine, supporting Bluetooth, wifi and direct connection to iOS and Android systems.

The wireless Bluetooth wifi labeling machine GT3600 can be connected to the mobile phone for content editing, printing bar codes and continuous labels, to meet the needs of large-scale batch printing. Multi-line table editing, one label can print more content, save more consumables, beautiful and standard; up to 50 print files in memory, save worry and effort, convenient and fast. In addition, the back of the labeling machine is equipped with a magnetic suction, which can free your hands. In addition to shortening the identification management time and reducing personnel pressure, it can also effectively reduce inventory loss and reduce operating costs.

Wireless label printer

Specification
