

Copper and aluminum composite terminal

Copper and aluminum composite terminal

Product material: new copper clad aluminum composite material.

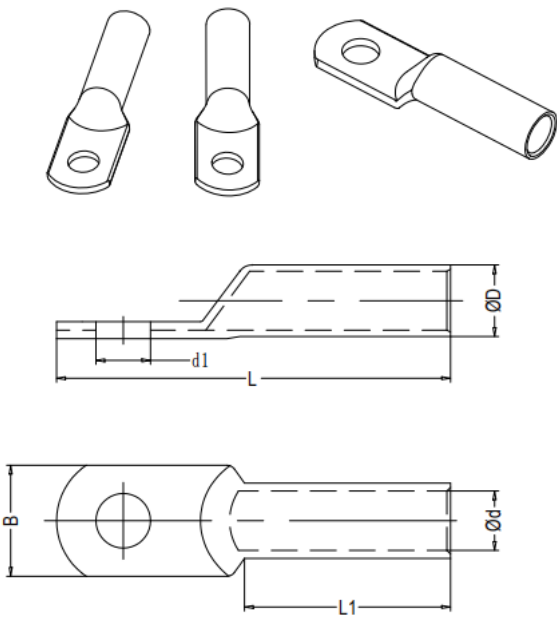

Product advantages: strong oxidation resistance, durability, current carrying capacity and stability.

For traditional products, it has better current carrying capacity, safety and stability. Also has metallurgical grade craft

Description: This product is suitable for use in harsh environments, high and low temperature environments.

Copper and aluminum composite terminal

Specification

Copper and aluminum composite terminal						
Model specification	d1	Dφ	dφ	L	L1	B
DTL16-8	8.5	9	6.5	68	37	16
DTL25-8	8.5	10	7	70	33	18
DTL35-10	10.5	11	8.5	80	36	20
DTL50-10	10.5	12	10	85	38	22
DTL70-12	12.5	14	12	95	43	26

DTL95-12	12.5	16	13.5	104	46	28
DTL120-14	14.5	18	15	112	49	30
